PROFESSIONAL SUMMARY

Product Designer with a zero-error mindset built from 3 years of QA leadership at Radiant Appliances. Specialize in end-to-end UI/UX — user research, wireframing, high-fidelity Figma prototypes, token-first design systems, and dev-ready handoffs. Built three production-level projects from scratch — Tarang (B2C social), Aurakshan (safety ecosystem), and Repairo (B2B SaaS) — all live with complete design systems and working prototypes. Frontend-aware designer comfortable with HTML, CSS, React, and GitHub. WCAG 2.2 AA practitioner. Actively seeking Junior or Associate Product Designer roles in Hyderabad or Remote..

CORE SKILLS

Design: Figma · Fig Jam · Figma AI (Agent, Make) · Spline

Code: React.js · HTML/CSS · JavaScript · GitHub · Tailwind CSS

UX Process: User Research · Wireframing · Prototyping · Usability Testing · Empathy Mapping · User Flows

AI Tools: Figma AI · Claude AI · Lovable · Google AI Studio · LLM-assisted workflows

Systems: Design Systems · Design Tokens · Information Architecture · WCAG 2.2 AA Accessibility · Dev Handoff

Soft Skills: Stakeholder Communication · Cross-functional Collaboration · Zero-Error QA Mindset

EXPERIENCE

Product Designer · Self-Employed / Freelance

Jan 2025 – Present

UI/UX · Interaction Design · Design Systems · React/Tailwind Prototyping

— Designed and shipped three production-level case studies — Tarang, Aurakshan, and Repairo — covering B2C social, safety ecosystem, and B2B SaaS domains. All three live with full design systems and working prototypes.

— Conducted 8 contextual user interviews for Aurakshan, leading to a documented pivot — scrapped an always-on AI feature after 7/10 testers rejected it as surveillance-like. Rebuilt around tiered consent-gated triggers.

— Designed Repairo for low-literacy users — photo-first documentation, numpad cost entry, icon-based navigation — removing literacy barriers rather than adding workarounds.

— Built token-first design systems across all three projects — 62+ variables, 175+ assets, handoff-ready in Figma Dev Mode — maintaining 2,244+ token-referenced fill bindings across 85 screens.

— Implemented WCAG 2.2 AA accessibility principles across all projects, achieving 98/100 Lighthouse accessibility score on the Aurakshan live prototype.

— Designed end-to-end user flows and wireframes across all three projects — from low-fidelity FigJam mapping through high-fidelity mobile-first UI.

— Prepared dev-handoff-ready Figma files using Dev Mode — token-referenced fills, Auto Layout components, annotated interactions.

— Applied AI-assisted workflows using Figma AI Agent, Claude, and Lovable to scale from 8 screens to 85 screens while maintaining design system consistency.

Key Projects

REPAIRO	B2B SaaS job management platform for local repair workers. 85 screens, complete design system, photo-first low-literacy design principle. Case study: repaire-case-showcase.lovable.app Live app: action-flee-78878932.figma.site
AURAKSHAN	Safety ecosystem for urban Indian women combining AI Guardian and Dristi digital abuse response. 32 screens, 8 user interviews, documented pivot. Case study: aurakshan-cs-safe.lovable.app Live app: memory-vary-27909173.figma.site
TARANG	Intent-driven social platform with Shield feature giving users control over their algorithm. Full design system, documented pivot. Case study: tarang-case-study.vercel.app Live app: revamp-shush-22720965.figma.site

QA Specialist & Sub-Leader · Radiant Appliances & Electronics Pvt. Ltd.

Jan 2020 – Mar 2023

Quality Assurance · Team Leadership · Cross-functional Collaboration

- Led QA operations for global electronics brands — Samsung, OnePlus, Nokia, Intel, Panasonic, and Motorola — at a high-volume manufacturing facility.
- Supervised a team of QA inspectors, improving defect detection rate by 10% through structured testing workflows and process optimization.
- Trained team members on QA methodology and customer empathy, developing a human-centered approach to product reliability — directly transferable to UX thinking.
- Built cross-functional communication skills across product, engineering, and operations teams, now applied to design stakeholder management and dev collaboration.
- Zero-Error inspection mindset now directly informs UX audits, edge case design, error state coverage, and quality-focused design handoffs.

EDUCATION

Google UX Design Professional Certificate — Coursera

Jun 2025

Diploma in Civil Engineering (3-Year Program) — Ratnapuri Institutions of Technology (RIT-COP)

Feb 2019

– Passed with **80% Aggregate** (First Class with Distinction)

Structural and systems thinking now applied to Information Architecture and product scalability.

CERTIFICATIONS

Google UX Design Professional Certificate — Coursera	
Intermediate to Advanced: Professional Figma UI/UX Design — Skillshare	Oct 2025
Figma Pro Pt. 3: Advanced Typography, Masking & Media — Skillshare	Sep 2025
Figma Pro Pt. 2: Interactions, Prototyping & UI Motion — Skillshare	Sep 2025
Figma Pro Pt. 1: Auto Layouts, Grids & Components — Skillshare	Sep 2025
Create High-Fidelity Designs and Prototypes in Figma — Google / Coursera	Jun 2025
Conduct UX Research and Test Early Concepts — Google / Coursera	Jun 2025
Build Wireframes and Low-Fidelity Prototypes — Google / Coursera	Jun 2025
Front End Development Libraries — freeCodeCamp	Sep 2024
Responsive Web Design — freeCodeCamp	Jul 2024
JavaScript Algorithms and Data Structures — freeCodeCamp	2024
